## Introduction

Thank you for using Photron FASTCAM Analysis (PFA).

This manual contains the operating instructions and warnings necessary for installing PFA.

Please read the entire manual before using the software.

If any part of this manual is unclear, contact Photron using the contact information printed at the back of this manual.

## Manual Notation

The following icons and symbols are used in the explanations in this manual.

Icon/Symbol	Description
	This symbol indicates instructions that should always be followed when using the software, or things to be careful of when using the software.
	This symbol indicates a space for you to use for making notes.
“ ”	This symbol is used to indicate the names of items on a screen, references, dialog names, and keyboard keys.
[ ]	This symbol is used to indicate screen names, button names, and menu names.
< >	This symbol is used to explain operating procedures in diagrams and supplementary items.

# Chapter.1. PFA Overview

---

## 1.1.PFA Overview

---

PFA was designed to be used as an assistant function for Photron FASTCAM Viewer (hereafter referred to as PFV), the camera control software for FASTCAM cameras.

With PFA, it is possible to analyze motion within an image sequence imported from PFV in order to obtain values for displacement, velocity and acceleration. Following analysis it is possible to achieve synchronized playback of the data graphs and images.

## 1.2.Operating Environment of PFA

---

PFA software can be run with the following OS and PFV environments.

- OS
  - Windows 7 (64/32bit version)
  - Windows 8.1(64/32bit version)
  - Windows 10(64/32bit version)
- PFV
  - Version 3.3.9 (64/32bit version) or later

## **Chapter.2. Installing PFA Trial Version**

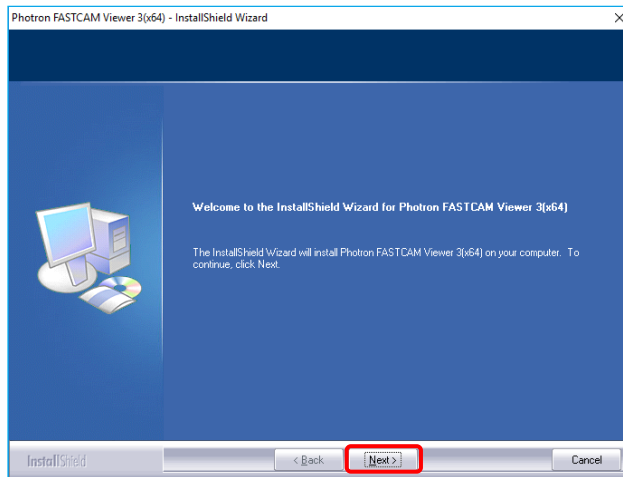

---

## 2.1. Installing PFA Trial Version

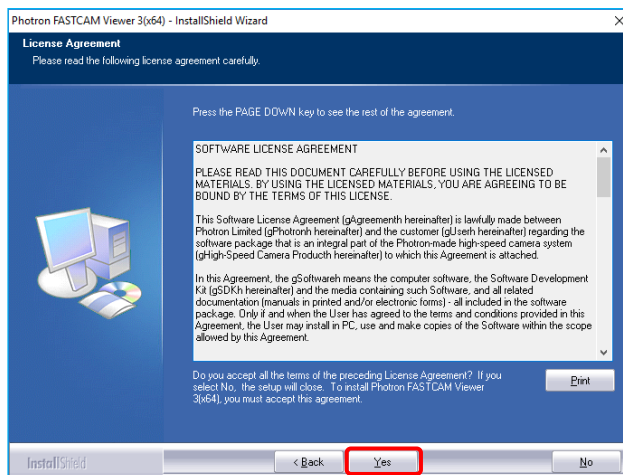

Install PFA using the following procedure.

1. Insert the PFV software installation disk.
2. On the optical disk drive, open the “PFV Setup32” folder or “PFV Setup64” folder, and then double click the file "setup.exe".

The PFV setup program starts, and then the following dialog box will appear. Click [Next].

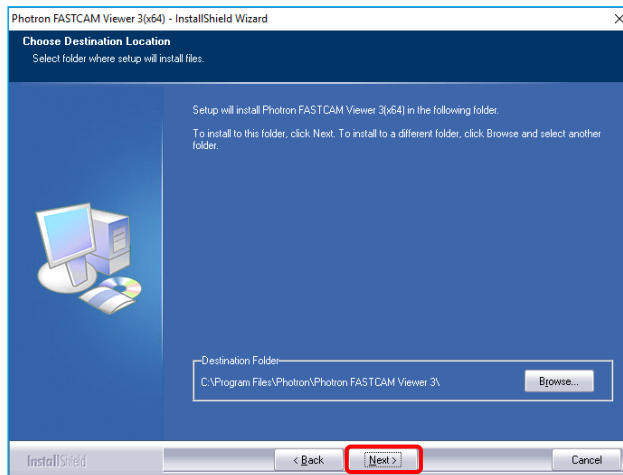

3. The user license agreement appears. Confirm the contents, and then click [Yes].

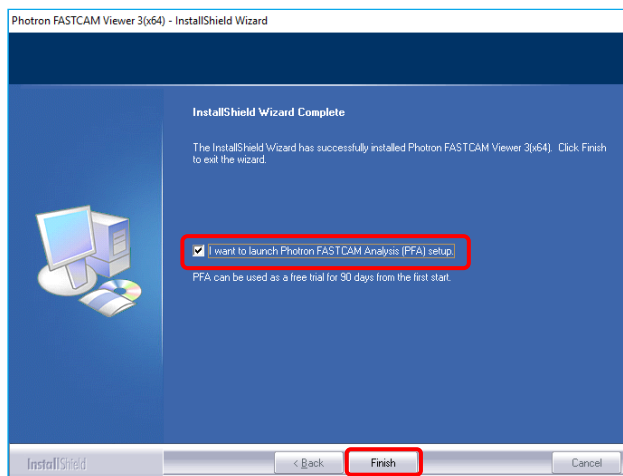

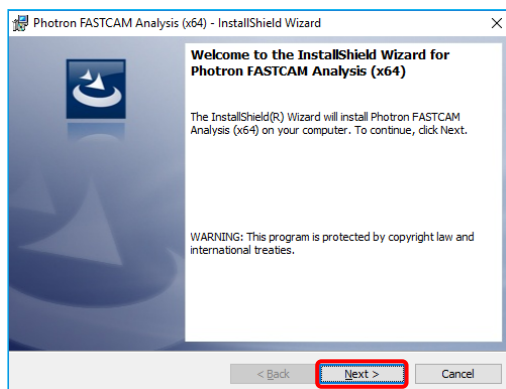

4. Specify the installation location.  
If necessary, click [Browse] and specify another location.  
Click [Next].

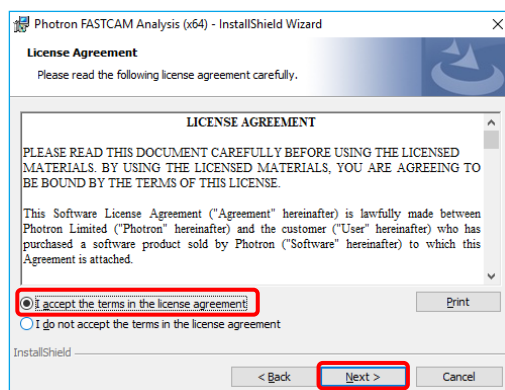

5. Installation starts.  
When installation is finished, the following screen appears.  
In order to automatically launch the installation of PFA, enable the check box of [I want to launch Photron FASTCAM Analysis setup] then click [Finish].

6. PFV setup program is finished and PFA setup programs starts.  
Then click [Next].

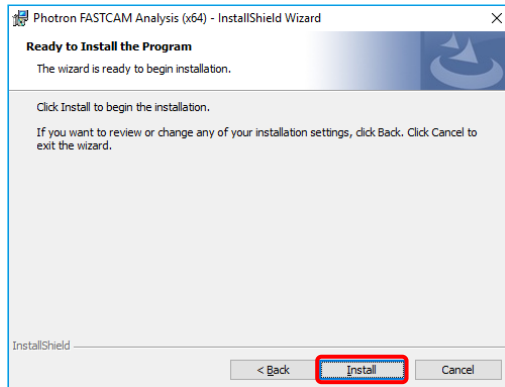

7. The user license agreement appears. Confirm the contents. And if you accept the terms in the license agreement, enable the check box of [I accept the terms in the license agreement] then click [Yes].

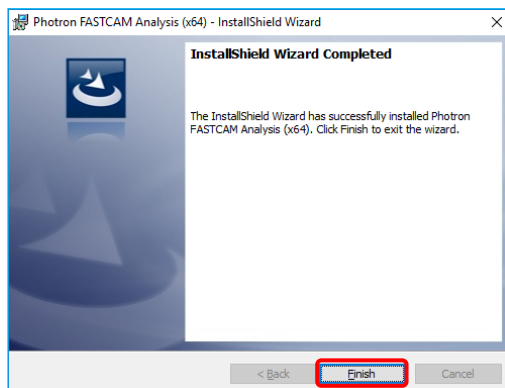

8. Specify the installation location.  
If necessary, click [Change] and specify another location.  
Click [Next]

9. Installation procedure is ready. Then, click [Install]

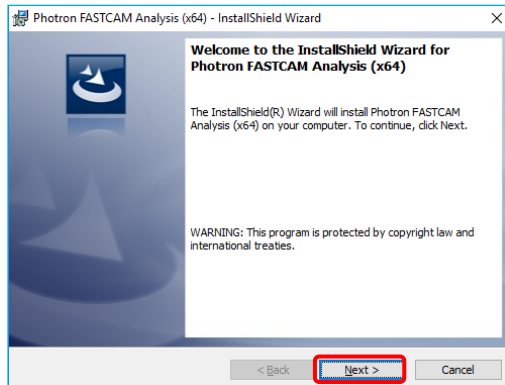

10. Installation starts.  
When the installation has finished, the following screen will appear.  
Click [Finish].

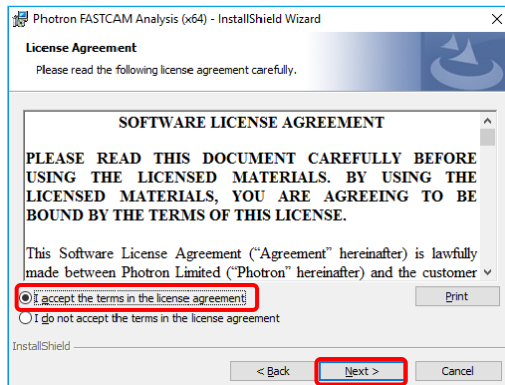

## 2.2.Installing PFA Trial Version “not via PFV installer”

Install PFA using the following procedure.

1. Insert the PFV software installation disk.
2. On the optical disk drive, open the "PFA\Setup32\_trial" or "PFA\Setup64\_trial" folder, and then double click the file "Setup.exe".  
The PFA setup program starts, and then the following dialog box will appear. Click [Next].

3. The user license agreement appears. Confirm the contents. And if you accept the terms in the license agreement, enable the check box of [I accept the terms in the license agreement] then click [Next].

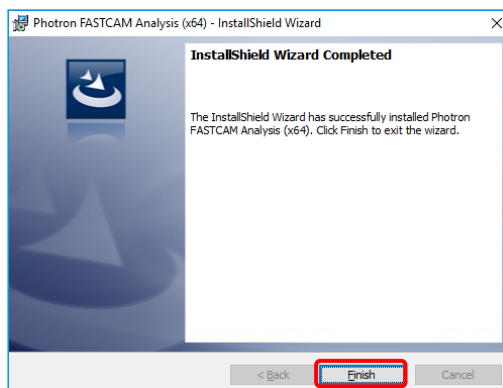

4. Specify the installation location.  
If necessary, click [Change] and specify another location. Click [Next]

5. Installation procedure is ready. Then, click [Install]

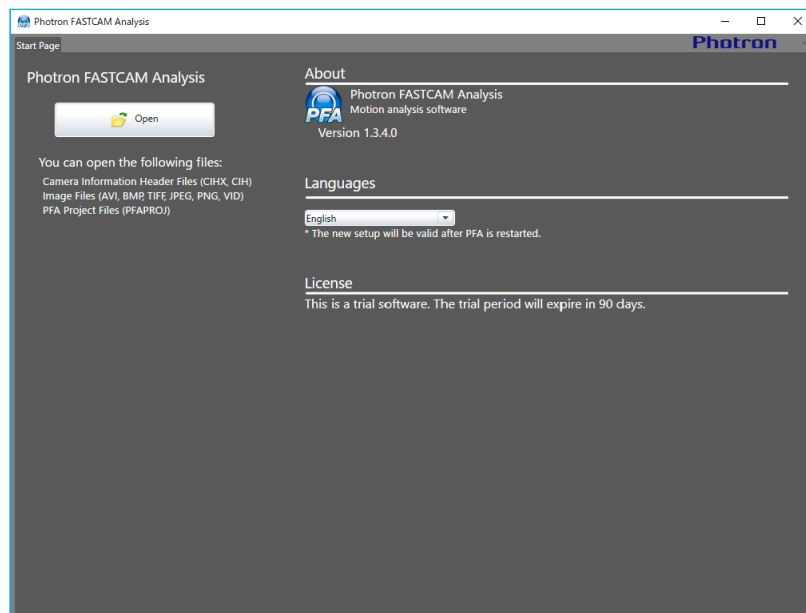

6. Installation starts.  
When the installation has finished, the following screen will appear.  
Click [Finish].

## 2.3.About PFA Trial Version

This is the startup screen after installing the PFA trial version.

---

## **Chapter.3. Installing PFA Licensed Version**

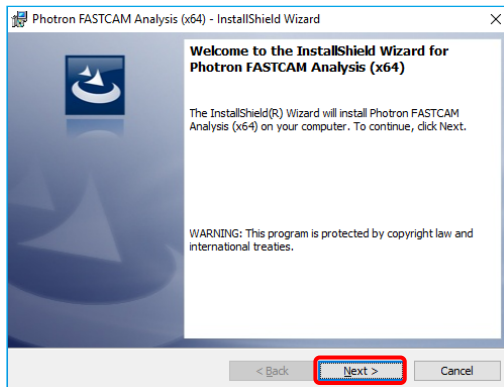

---

### 3.1 .Installing PFA Licensed Version

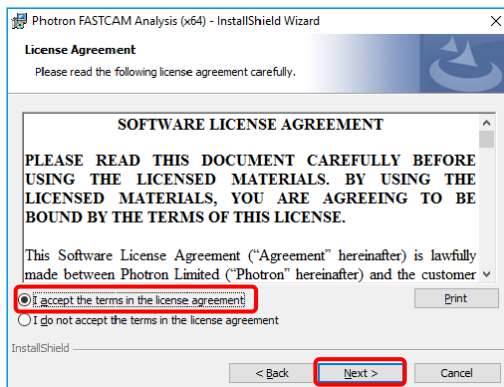

Install PFA using the following procedure.

1. Insert the PFV software installation disk.
2. On the optical disk drive, open the "PFA\Setup32 " or "PFA\Setup64 " folder, and then double click the file "Setup.exe".

The PFA setup program starts, and then the following dialog box will appear. Click [Next].

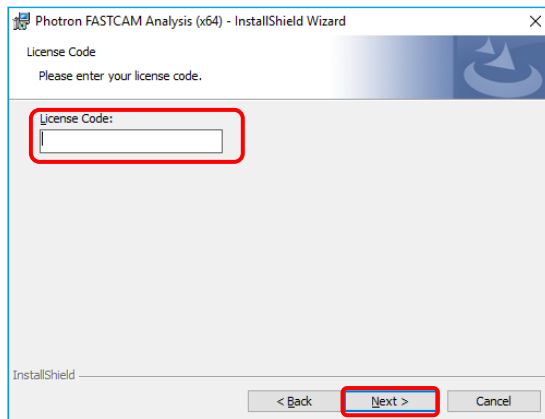

3. The user license agreement appears. Confirm the contents. And if you accept the terms in the license agreement, enable the check box of [I accept the terms in the license agreement] then click [Next].

4. The license code input screen appears.  
Enter the license code of the product you purchased and click the [Next] button.

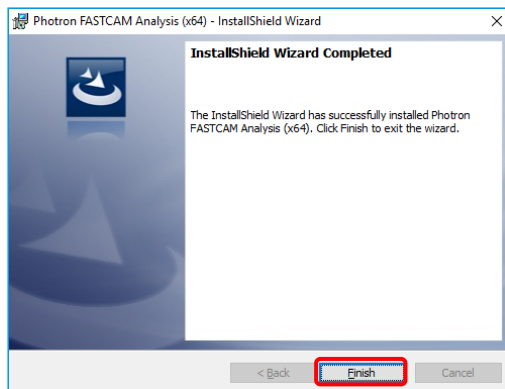

5. Specify the installation location.  
If necessary, click [Change] and specify another location. Click [Next]

6. Installation procedure is ready. Then, click [Install]

7. Installation starts.  
When the installation has finished, the following screen will appear.  
Click [Finish].

## 3.2.About PFA

This is the startup screen after installing the PFA.

Not like the trial version, this screen does not have the "License" description.

### ! Caution

- PFA can be installed to 1 PC per 1 purchase
- When to change the PC to use, first uninstall the PFA installed to the old PC, and then reinstall PFA to the new PC.

## Chapter.4. Using PFA

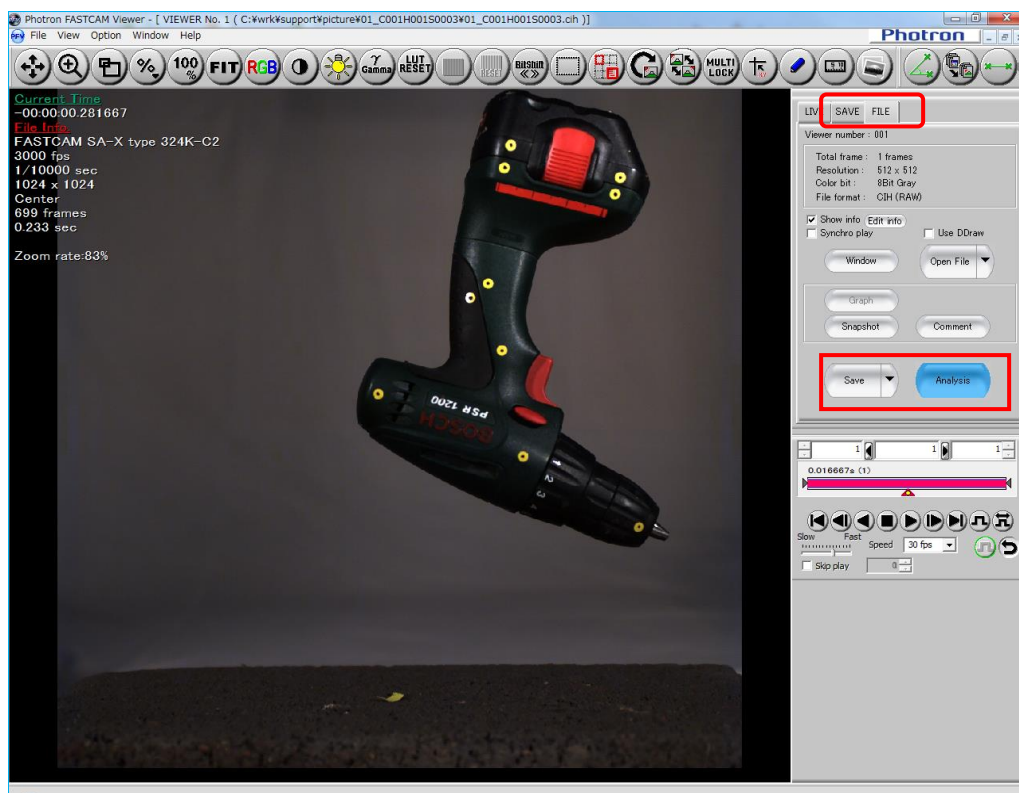

---

## 4.1.Launching PFA

1. Go from [Start] to [All programs] to [Photron FASTCAM Viewer 3] - "PFV Ver.3".

Or double-click  on the desktop.

2. PFV starts. Before launching PFA, you need to either use an installed camera to record some images into memory or open some existing images located on the computer using the [File View] function.

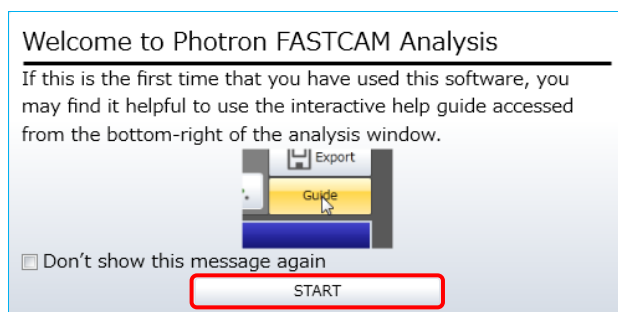

3. Launch PFA from [Analysis] button.

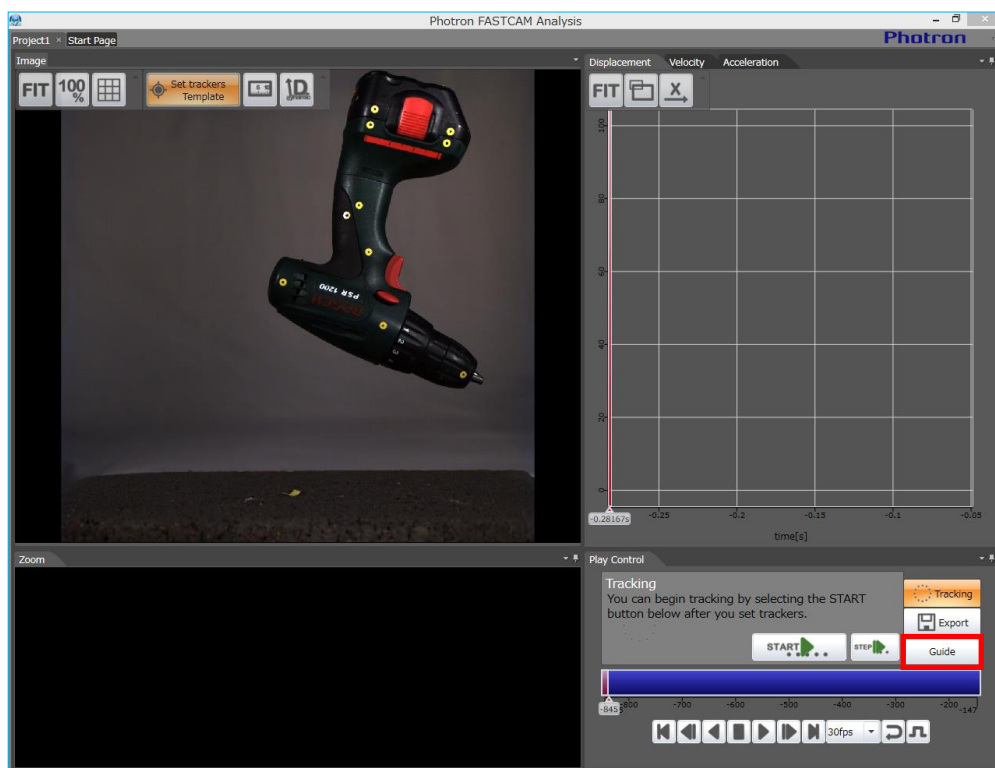

#### 4. Launch PFA.

Once PFA has launched for the first time a welcome screen will be displayed to inform you about the interactive help guide, select START to continue to the software.

PFA has a powerful interactive help guide with step-by-step instruction on how to carry out an analysis. If this is the first time that you are using this software we recommend that you use this guide – select “Step by Step Guide Function” to begin.

## 4.2.Starting PFA by Shortcut

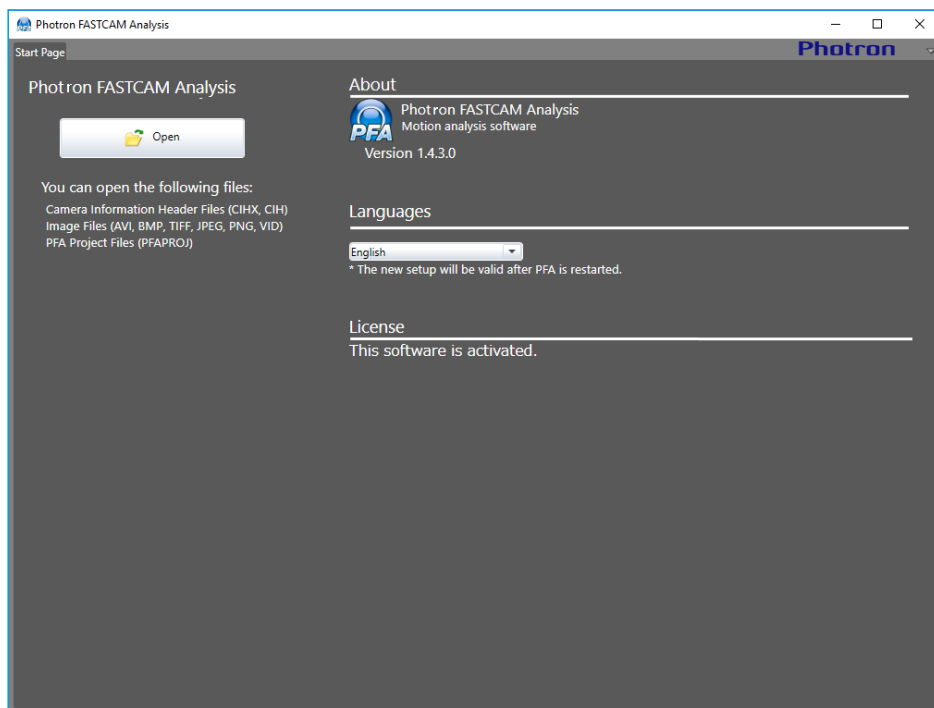

1. Go from [Start] to [All programs] to [Photron FASTCAM Analysis].

Or, double-click

on the desktop.

2. PFA starts. The below window comes up immediately.

3. Read the target image that you wish to analyze. Locate the image file and click [Open] to read the image data in.

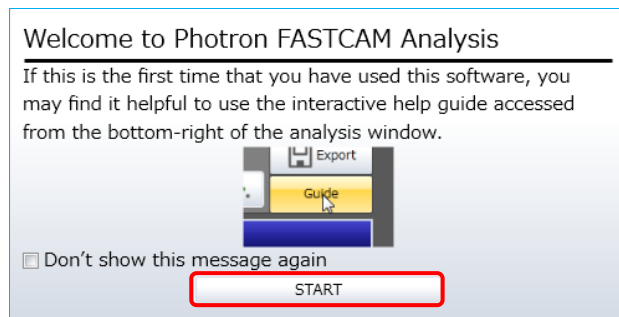

Image files that PFA can read in are the camera information header (CIHX, CIH) file, image data files (AVI, BMP, TIFF, PNG and VID) and the PFA project file (PFAPROJ).

As soon as an image data file has been read in, the below window is displayed. Enter the frame rate at which the movie image was shot, and click [OK].

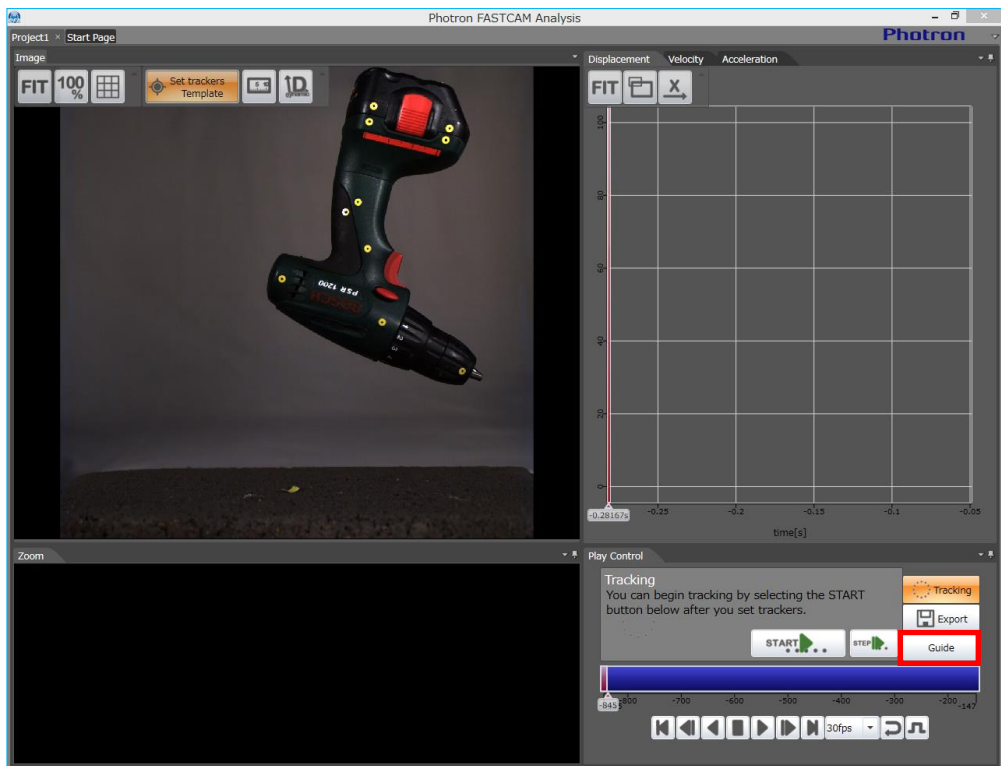

- Once PFA has launched for the first time a welcome screen will be displayed to inform you about the interactive help guide, select START to continue to the software.

PFA has a powerful interactive help guide with step-by-step instruction on how to carry out an analysis. If this is the first time that you are using this software we recommend that you use this guide – select “Step by Step Guide Function” to begin.

## **Chapter.5. Contacting Photron**

---

## 5.1. Contacting Photron

For inquiries related to PFV and PFA software, contact Photron at the contact information listed below.

Additionally, the following items will be verified when inquiring, so please prepare them in advance.

Items Verified	Concrete Example
Contact Information	Company, school or organization name, customer contact name, contact phone number, contact e-mail.
Product Name	The Photron FASTCAM Analysis version number. The Photron FASTCAM Viewer version number. For the version number, check the version information.
Condition of the system and what is known about it.
